

ART CLAY SILVER PAPER TYPE is a wonderful product that has many design possibilities. It may be folded and scored as described in the instructions included with the packaging but it also has wonderful possibilities when applied to other ART CLAY PRODUCTS as an appliqué. The PAPER TYPE cuts easily with a craft knife, polymer blades or scissors. It can be punched with hundreds of paper punches now available in scrap booking and craft stores or cut with rotary paper cutters into shapes to apply to a dry Art Clay base or onto porcelain or ceramic bisque items.

Directions

Begin by preparing the base piece using ART CLAY SILVER CLAY, PASTE OR SYRINGE TYPE. The piece should be filed, sanded, finished and completely dry application. When working with PAPER TYPE use only a slightly damp brush, never a wet brush, as designs may dissolve or break. Thin the PASTE TYPE to milk consistency. Apply a small amount of thinned PASTE TYPE to the dried base only in the area you wish to apply the appliqué. Quickly apply the appliqué to the base using a damp brush or tweezers. Be careful not to get Paste Type on the surface.

If you wish to use the Paper Type as a stand-alone piece, create a fan-folded or origami shaped design. You may also cut or punch out at least two pieces and paste them together using a small amount of thin paste. Remember, since Paper Type contains almost no moisture, the use of too much water will cause the piece(s) to dissolve or break. Use only a drop of Paste Type to adhere the pieces together and only a damp brush to smooth. Once dry the piece may be lightly sanded or filed. It is recommended that Paper Type be allowed dry naturally. Adding additional heat may result in cracking and flaking. Fire the dry piece at 1472°F for 30 minutes. We do not recommend firing larger pieces with a torch, but appliqué pieces may be torch fired successfully. Remember to support pieces with fiber blanket where needed when kiln firing. Paper Type has a different binder than the other types of Art Clay. Do not mix scrap pieces of Paper Type with other types of Clay or Paste.

Note: The same paper punches used for scrap booking, or Art Clay Silver Paper Type punch-outs, can be used to produce gold foil elements to add to your finished silver pieces.
